Individual Contribution Report

Project Name: KarlOS – Mini Operating System (MiniOS)
Name: Karl Frederick Sitjar
Course/Year: BSIT-3

Contributions and Responsibilities

I contributed to the development and documentation of our KarlOS MiniOS project. My responsibilities included the following:

1. **GitHub Repository Management** – Created and managed the GitHub repository for our KarlOS project, ensuring that the source code and project files were organized and accessible to the group.
2. **Technical Documentation** – Prepared the technical documentation to explain the project's structure, functionality, commands, and implementation of the MiniOS program.
3. **User Manual** – Created the user manual to guide users on how to run the program and use its available commands and features.
4. **Screenshots and Documentation Evidence** – Captured screenshots of the program and its commands to provide evidence of the system's functionality and support the project's documentation.

Summary

My main contributions focused on repository management, technical writing, user guidance, and capturing screenshots for the KarlOS MiniOS project. These tasks helped organize the project's source code, document its features, and demonstrate how the system works.
