Individual Contribution Report

Project Name: KarlOs -- Mini Operating System (MiniOs)

Name: Danica Grace B. Perjes

Course/Year: BSIT-3

Contribution & Responsibility

I contributed to the development and presentation of our **KarlOS MiniOS Project**. My responsibilities included the following:

1. Project Demonstration

- Demonstrated the functionality of the KarlOS MiniOS project by showcasing its features, commands, and overall system operation.

2. Video Presentation and Voice-Over

- Created and delivered the project's video presentation, providing a clear voice-over explanation of the system, its purpose, and how it works.

3. System Walkthrough

- Guided viewers through the execution of the program, explaining the available commands, expected outputs, and user interactions within the MiniOS environment.

4. Project Communication and Presentation

- Presented the project in an organized and understandable manner, highlighting its key features, capabilities, and implementation to effectively communicate the team's work.

Summary

My main contribution focused on demonstrating and presenting the KarlOS MiniOS project through a video presentation with voice-over narration. I explained the system's features, commands, and functionality while guiding viewers through its operation. This helped showcase the project's capabilities and provided a clear understanding of how the MiniOS works.
